

PRODUCT UPDATE

ANTIBACTERIAL FUSIBLE INTERLINING

Our innovative TopFuse interlining article 3660ABX, made from 100% cotton with a weight of 230 g/m², offers exceptional comfort with a soft, rich, and luxurious handfeel.

In traditional Arabic thobes, this new product development is generally only applied to the front placket, where its smooth texture enhances both appearance and comfort. Its dimensionally stable structure, antibacterial finish, and mold-preventing properties ensure lasting freshness, durability, and a premium look.

Key Features

- **Antibacterial finish** for enhanced hygiene and **mold prevention** in packaging.
- **High bond strength** ensures long-lasting adhesion and garment shape retention.
- **Colour options:** White, Off-White, Cream, Light Blue White, Black, and Charcoal.
- **HDPE-Powder coating** for reliable fusing performance.
- **Shrinkage control:** Wash shrinkage 0.5 / -2.0%, heat shrinkage max $\pm 0.5\%$.

Processing Recommendations:

- Fusing temperature: 160–175°C
- Pressure: 10–30 N/cm²
- Time: 12–18 seconds

To achieve the best possible results, we recommend conducting specific washing, fusing, and dyeing tests on the actual fabric before starting bulk production.

Articles in different weights are possible upon request.

366ABX

Contact us

At Wendler Interlining, we combine technical know-how with over 50 years of experience to help garments perform at their best.

Professional quality isn't just about the outside - it's what's inside that counts.
